RBG-100

Teller cash recycler

Whether you're looking to transform your branches or simply improve efficiency for increased profitability, the RBG-100 will support your strategy. Enabling open plan layouts, reduced start / end of day processes, faster teller transactions, redeployment of staff and enhanced customer experience – the RBG-100 delivers.

RBG-100 teller cash recyclers deliver an intuitive, secure, flexible, and integrated teller automation solution to address the real needs of your customers and staff.

Up to 17,100 Note Capacity

RBG-100 accommodates up to 12,600 recyclable notes and 4,500 additional notes for deposit only.

Advanced Error Recovery

By incorporating innovative note reading technology into our error recovery process, the RBG-100 can ensure a balanced cash inventory by automatically performing a partial cassette verification as needed.

Configurable Cassettes

By using a split cassette to hold the two least dispensed denominations, the RBG-100 minimizes footprint and maximizes efficiency by utilizing only five cassettes, along with the collection/overflow drawer, to store up to seven denominations and to recycle six.

Continuous Feed Hopper

With a 300 banknote non-fixed entrance, the RBG-100's continuous feed hopper aids in the non-stop feeding of notes during large transactions. This not only enables a financial institution to engage more with their customers due to lack of machine interruption, but also allows them to finish those transactions faster.

Enhanced Security

The UL 291 approved safe allows for overnight storage of banknotes in both the cassettes and the overflow/collection drawer.

Dimensions (H x W x D)	With operation monitor: 48.0" x 16.5" x 38.7" Without operation monitor: 44.2" x 16.5" x 38.7" Under counter: 37.2" x 16.5" x 21.9"
